JANUARY 1989

AARC CHRISTMAS PARTY - look who's at the head of the line!

What him again!? Most Covetted Award..

AARC Members KL7GM, Bill Barber and KL7PG, Harold Hitchen, longest running Hams..52 yrs and 51 yrs respectively.

HAM CALENDAR

January 1 - Happy New Year!

January 6 - AARC General Meeting, Spenard Rec Center, 7 pm.

January 10 - AARC Board Meeting, Hope Cottage Meeting Rm., 7 pm.

VEC TESTS:

Anchorage: First Wed. at 6:30 pm, Blood Bank, 4000 Laurel St.

Eagle River: Third Wed. at 7:00 pm, Eagle Rvr VFW Hall.

(For Information on testing call Roger, KL7HFQ at 243-2221 or 786-8121.)

Youngest Ham there and I missed her name! 14 yrs. old.

NEWS FROM THE DOG KENNEL - NL7DK

The first thing is a great big Thank You to Dianne-NL7KN, Linda-NL7FY, and all of their helpers who did all the planning for such a Great Christmas party. We are now heading into the busy and interesting and fun time of the year for Ham Radio. Next month brings Fur Rondy with the Dog Races, the Grand Prix Car Races and lots of other interesting events. Then comes the Iditaski, Iditabike, and then the Iditarod Sled Dog Race. All of these depend on Amateur Radio for their prime Communications Net. If you haven't been involved in any of these now is the time to try it out. We can always learn somethin new and have a good time while doing them. Our ARES Net is coming along nicely with more check-ins each week. This is one facet that we hope we never have to use, but it is certainly better to know that we have so many Hams ready to work in Emergencies than to have to scratch for help. I have been monitoring 14.275 in the afternoons and they are running the Net to handle traffic for the Armenian Earthquake Health and Welfare. It has been amazing to find how many stations are calling in from all over the US and beyond to offer assistance if needed. It's just the thing to do. If you have friends who show the least interest in Ham Radio get them into the last class to be given by KL7CG-Wilse Morgan. We will be missing those classes after mid year. Well, enough for now as I am going to either listen to HF, play with Packet or study to up grade and I haven't decided which HI, HI. 73 NL7DK

Harvey

EDITOR'S NOTE: Winners of the Fall Raffle, which took place at the AARC Christmas Party, December 2nd, were: First - Nancy Bosko (KL7BOR's XYL, Second - AL7FG, Diane Marshal, and Third - AL7JM, Mike Bennett.

December 13, 1988 AARC Board Meeting

Meeting was held at the QTH of NL7DK, President. Opened at 7:10 PM

Toni and Steve Smith, members of the Hillside East Community Council presented their concerns about commercial towers. They do not want commercial enterprise in Hillside area period. Planning & Zoning committee-GCI applied for conditional use antenna equipment (describing themselves as public utility) in Hillside. Board told them to get definition of public utility from assembly members. Planning and Zoning decided to allow GCI 2 eight foot and ten foot diameter antennas. Hillside East Community Council plans to appeal this decision. KL7HFM suggested that Hillside get definition of type and uses of the proposed antennas. KL7IKX pointed out that AARC uses 2 commercial radio sites on Hillside for important public service. Chugach State Park mountain tops were brought up as possible antenna sites. KL7YF pointed out Chugach's intransigence against putting antennas on the periphery of park. KL7HFM suggested we request our legislators to set aside portions of the Park for antennas. The Assembly is studying non-residential areas as possible sites. AL7BB pointed out existing problems with RF due to all the electronics in use in the Anchorage Bowl. Certain sites could also be problems because of their inaccessibility, snow, etc. Toni suggested we participate in decision-making in Assemblies board considering sites. KL7HFM suggested we speak to our state and local legislators. Hillside East Community Council is not against us, simply against commercial enterprise in their area. AL7BB pointed out that antenna regulation can set a precedence for further regulation leading to over-regulating. NB4U- George Sharrock mentioned that if we work through the Assembly, we could end up with a compromise. He suggested that we use the Assembly to try to get use of the periphery of the State Park. Toni also suggested we work on rechanging the Park's Master Plan to allow antenna use on the edge.

Now to the rest of meeting. Treasurer says we are still solvent. WE will be setting up a second account to keep track of any Gaming funds as required by the State. KL7HM- Looking into more sites for pulltabs. KL7IKX-VHF He was able to obtain a backup battery for DVR through a donation. Packet system back on the air. Inremod problems go on. KL7IKX-Doug is Frequency coordinator for Packet for South Central area. Discussion regarding use of a Butternut vertical for Iditarod was held. A motion was made and seconded to "Sponsor a Special Events Station during Iditarod" passed. KL7IZC moved that "the Club pay for QSL cards for the Special Event Station up to \$300". Seconded and passed. Felt if more money needed it could be asked for later. NL7DK mentioned the need for 2 meter gear for the Armenian Earthquake situation and received negative reaction. NL7DK asked opinion regarding meeting in a small room for two of our meetings or change the date. It was felt that the meeting should remain the 1st Friday period. DK will discuss same with Rec Center. Meeting adjourned at 9:10.

Respectfully submitted by 1.NL7DL-Lil took notes and 2. NL7DK-Harvey took liberties with the notes. NL7DK.

EDITOR'S NOTE: All commercial Ads for which I do not have record of payment since I took over the AARC Newsletter in April 1988 will be removed from the newsletter next month. If this concerns you and you need to contact me, call 562-0326. -Anne, AL7KM

Report No. DC-1276

ACTION IN DOCKET CASE

November 2, 1988

FCC PROPOSES EXPANSION OF THE 6 METER REPEATER
SUBBAND FOR THE AMATEUR SERVICES
(PR DOCKET 88-527)

The Commission has proposed amending its amateur service rules by expanding the 6 meter repeater subband by 1 MHz.

Currently, one-half of the 4 MHz comprising the 6 meter band, 50-54 MHz, is authorized for repeater operations. However, because of the growing number of repeater stations in the 6 meter band, a larger repeater subband has been suggested.

The Commission stated that expansion of the 6 meter repeater subband could provide for additional flexibility in the use of the 6 meter band. With this added flexibility, the amateur community could then determine for itself exactly how the additional 1 MHz spectrum could be used. Some possibilities are that in urban areas, the 1 MHz could be used for additional repeater operation and in less populated areas where additional repeater operations are not an immediate need, the spectrum could be used for other types of operation.

Although there appears to be a strong demand in the amateur community for the expansion of the 6 meter repeater subband, the Commission expressed concern about the effect such an expansion would have on the other users of the 51.0-52.0 MHz segment. Therefore, comments are invited on whether expansion of the 6 meter repeater subband is needed and its impact on existing users.

Action by the Commission October 31, 1988, by Notice of Proposed Rule-making (FCC 88-354). Commissioners Patrick (Chairman), Quello and Dennis.

6559	97.61	Nicholas W. Sayer, (N6QQQ) 328 Northbank #17 Stockton, CA 95207 (Filed by Petitioner)	7-11-88	Request to amend the Amateur Radio Service Rules to authorize Technician class amateur operators to use emission F1B (RTTY, AMTOR, and packet radio) in the 80, 40 and 15 meter bands.
6560	22.521(b)	COM/NAV Marine, Inc. (Thomas Gutierrez, Attorney Lukas, McGowan, Nace & Gutierrez, Chartered 1819 H Street, N. W., Seventh Floor Washington, D. C. 20006)	8-26-88	Amendment of the Commission's Rules to include Columbia, Missouri in the table of assignments for air-ground stations in the Public Land Mobile Service.

INTRODUCTION TO PACKET RADIO by John Antonuk AL7ID

part 3

The use of digipeaters is a great way to extend the range of packet stations. There are some problems built into the process however.

Unlike a direct connection, the digipeating station does not check for errors and return acknowledgements or negative-acknowledgements (acks or naks). The origination and destination stations still do acks and naks but it is possible to have a packet "crash" somewhere inbetween while being digipeated. If this happens the originating station senses that it did not receive an ack and retransmits the packet. If a long list of digi's is involved this means quite a long delay. The throughput or speed with which traffic moves is hampered.

Another possible problem lies within the fact that over long paths propagation changes. The Anchorage to Fairbanks link is a perfect example. Since there is more than one list of digipeaters that may be specified you might not pick the best path every time. Some times your signal might not get through at all.

Wouldn't it be nice to have error checking at every intermediate step and not have to guess about the best route to take? Guess what! You can now have you packet cake and eat it too. The system for doing all this is called NET/ROM. Digipeater stations can buy and install a replacement firmware chip for their TNC's that upgrades them to become a NET/ROM node. This upgrade is not required nor even recommended for NET/ROM users, just for special digipeaters.

Here is an example of NET/ROM in action:

```
Cmd:C KL7AA-1
*** CONNECTED to KL7AA-1
C AL7ID
ANC:KL7AA-1} Connected to AL7ID
```

Once you connect to the KL7AA-1 NET/ROM node you then issue the command to connect to AL7ID. The node then connects you to AL7ID. For local use this seems no different than regular digipeating. Where the advantage comes in is when you want to go beyond your local area.

You need to know the name of the node that the distant station you want to talk with is within range of. Note that NET/ROM nodes can be connected to with their aliases. For example: C ANC can be used in place of C KL7AA-1. This holds true for only digipeaters with NET/ROM installed. An example of connecting to a distant station is:

```

Cmd:C ANC
*** CONNECTED to ANC
C WSL
ANC:KL7AA-1 } Connected to WSL:KL7EKI
C AL7FI

```

Now granted, Rich isn't very far away but two NET/ROM nodes are involved in our example. Error checking is used in every step of the path here.

You can get a list of the nodes that ANC knows the existence of by Connecting to ANC and then typing NODES. Again the destination must be within range of one of these nodes. If not you can digipeat in the normal manner from the closest node. That's how the link to Fairbanks works.

```

Cmd:C ANC
*** CONNECTED to ANC
C BYERS
ANC:KL7AA-1 } Connected to BYERS:KL7EDK-1
C KL7GNG via FAI

```

This method connects you through the ANC node, WSL node, to the BYERS node. From there you specified the use of another digi to reach Tom's BBS in Fairbanks. Substitute any call you like in place of KL7GNG for your contact in Fairbanks.

Here is a list of state digipeaters, their aliases, and NET/ROM status. This should aid greatly in making connects.
